## Einleitung

Nach einer Pause im Jahr 1980 haben wir, Barbara Willing und Eckhard Willing, die Kartierung der Orchideen des griechischen Festlandes im April 1982 fortgesetzt. Dabei haben wir uns auf die Nomi Etolia-Akarnania, Fokis und Lefkas konzentriert und einen nur kurzen Abstecher nach Achaia gemacht. Die Fundstellen sind in folgender Karte dargestellt:

Die Ergebnisse dieser Kartierungsreise haben wir als „Beitrag zur Verbreitung der Orchideen Ätoliens und Akarnaniens sowie der Insel Lefkas (NW-Griechenland)“ in Mitt.Bl.Arbeitskr.Heim.Orch.Baden-Württ. 15 (3): 351-413; 1983 veröffentlicht.

Da wir zu dieser Zeit noch kein GPS-Gerät besaßen, haben wir die Koordinaten der Fundpunkte nach Besten Wissen und Gewissen von den Nomos-Karten 1 : 250.000 abgelesen.
