

**Bericht über unsere Sammelreise 1986 nach
S-Griechenland
für die
Flora Hellenica**

von
Eckhard Willing
Berlin, November 1996

Einführung

Korfu und ausgewählte Gebiete in Ioannina und un Zentral-Makedonien standen im Mittelpunkt unserer (Barbara Willing und Eckhard Willing) diesjährigen Orchideen-Kartierung. Etwa ein Drittel der Fundpunkte lag unterhalb von 100 m, überwiegend auf Korfu, etwa ein Drittel lag oberhalb von 900 m. Auf Korfu war vor Allem die Gattung *Serapias* interessant, oberhalb von 900 m interessierten uns besonders die Berg-Orchideen.

Sämtliche Belege liegen im Herbarium des Botanischen Museums Berlin-Dahlem.
